MANAGING DIRECTOR'S STATEMENTS 董事總經理報告

Review of Results

Profit attributable to owners of the Company increased by HK\$319.2 million to HK\$406.3 million (2008: HK\$87.1 million), representing an increment of approximately 367%. Basic earnings per share also increased by 365% to HK\$0.223 (2008: HK\$0.048).

The increase was mainly attributable to the following three factors:

First of all, the Group aborted its investment in the redevelopment project "Zi You Xiao Zhen" by disposing its entire 22.62% equity interest in 北京君合百年房地產開發有限公司(「君合百年」) in 2009. A gain on disposal of approximately HK\$122.5 million was thus recognized.

Secondly, the fair values of the Group's investment properties and leasehold properties increased significantly in light of the rapid and prominent recovery of the property market after the financial tsunami triggered by the subprime crisis in September 2008. Consequently, the Group recognized revaluation gains of approximately HK\$65.6 million in aggregate in 2009. However, there was a revaluation loss of approximately HK\$39.3 million in 2008 in light of the recessed market shortly after the outbreak of the financial tsunami. The effect of the foregoing was to increase the profit of 2009 by approximately HK\$104.9 million.

Lastly, due to the same reason caused by the subprime crisis, the Group recognized unrealized gains of approximately HK\$48.5 million in aggregate in respect of

Business Review & Prospects *(Continued)*

During the year, 科馬實業 was concentrating its effort on expanding its operations. In this regard, profit contribution from 科馬實業 was only minimal. The Group has confidence in the business model of 科馬實業 and has established business plan for 科馬實業 to build up sustainable and fast profit growth in the next few years. The Group has an intention to spin-off 科馬實業 at appropriate time.

Distressed Assets Business

The Huarong Portfolio

The performance in disposing the Huarong Portfolio was unsatisfactory in the past two years, particularly during the post-financial crisis period in 2009. Investors' attentions were drawn to those highly depreciated assets resulting in barely any disposal of distressed asset in the Huarong Portfolio. Therefore, after serious negotiations with China Huarong Asset Management Corporation ("China Huarong"), a compromised arrangement was reached by the end of 2009. The Group agreed to sell all the remaining distressed assets with a carrying value of approximately HK\$88.8 million in the Huarong Portfolio back to China Huarong at a total consideration of RMB63.7 million for the purpose of realizing further working capital and concentrating effort on other businesses of the Group.

The amount of cash recovered from the Huarong Portfolio was RMB498.6 million in aggregate, which is equal to the cost of acquiring the Huarong Portfolio. Having taken into account the effect of RMB appreciation during the past few years and the interest generated from the cash recovered, the Group was able to achieve a breakeven investment, as a whole, in investing in the Huarong Portfolio.

The Orient Portfolio

The disposal of the Orient Portfolio was substantially completed in 2009. The revenue contribution for the year was only HK\$1.7 million (2008: HK\$40.0 million). The decrease in revenue contribution was due to and was in line with the decrease in the amount of distressed assets outstanding and pending disposal. To summarize, the cumulative cash recoveries of the Orient Portfolio was approximately RMB662.2 million (equivalent to approximately HK\$749.9 million) in aggregate, representing a recovery rate of 3.1%. In the opinion of the Board, the disposal of the Orient Portfolio was successfully completed.

金融投資

不良資產業務

華融資產包

於過去的兩年，處置華融資產包的成果並不理想，尤其是在後金融海嘯的二零零九年期間。投資者的注意力都轉移到那些已經嚴重貶值的資產；故此，幾乎未能成功處置任何華融資產包內之不良資產。因此，經過與中國華融資產管理公司(「中國華融」)認真協商後，於二零零九年未達成一項妥協安排。本集團同意把華融資產包剩餘、賬面值約88,800,000港元的不良資產，全部賣回給中國華融，代價為人民幣63,700,000元，目的為進一步套現營運資金並集中精力於處理本集團的其他業務。

處置華融資產包累計已收回的現金總額約為人民幣498,600,000元，與收購華融資產包的代價相約。如計及過去幾年人民幣升值的影響以及回收現金衍生的利息收益，總的來說，本集團於華融資產包這項投資，可以達到收支平衡。

東方資產包

處置東方資產包之工作，基本上已於二零零九年度內完成。年內貢獻之收益僅有1,700,000港元(二零零八年：40,000,000港元)。收益貢獻減少乃由於並且與其未處置的不良資產結餘減少吻合。總的來說，處置東方資產包累計回收現金總額約為人民幣662,200,000元(相當於約749,900,000港元)，相當於處置回收率約為3.1%。董事會意見認為，處置東方資產包之工作，已成功地完成。

Basis of consolidation (Continued)

Minority interests in the net assets of consolidated subsidiaries are presented separately from the Group's equity therein. Minority interests in the net assets consist of the amount of those interests at the date of the original business combination and the minority's share of changes in equity since the date of the combination. Losses applicable to the minority in excess of the minority's interest in the subsidiary's equity are allocated against the interests of the Group except to the extent that the minority has a binding obligation and is able to make an additional investment to cover the losses.

Business combinations

The acquisition of businesses is accounted for using the purchase method. The cost of the acquisition is measured at the aggregate of the fair values, at the date of exchange, of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquiree, plus any costs directly attributable to the business combination. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under HKFRS 3 Business Combinations are recognised at their fair values at the acquisition date.

Goodwill arising on acquisition is recognised as an asset and initially measured at cost, being the excess of the cost of the business combination over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities recognised.

Goodwill (Continued)

Goodwill arising on acquisitions on or after 1 January 2005 (Continued)

Goodwill arising on an acquisition of a business is carried at cost less any accumulated impairment losses and is presented separately in the consolidated statement of financial position.

For the purposes of impairment testing, goodwill arising from an acquisition is allocated to each of the relevant cash-generating units, or groups of cash-generating units, that are expected to benefit from the synergies of the acquisition. A cash-generating unit to which goodwill has been allocated is tested for impairment annually, and whenever there is an indication that the unit may be impaired. For goodwill arising on an acquisition in a financial year, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that financial year. When the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated to reduce the carrying amount of any goodwill allocated to the unit first, and then to the other assets of the unit pro rata on the basis of the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss for goodwill is not reversed in subsequent periods.

On subsequent disposal of the relevant cash-generating unit, the attributable amount of goodwill capitalised is included in the determination of the amount of profit or loss on disposal.

於二零零五年一月一日或之後收購時所產生之商譽(續)

因收購業務而產生之商譽是按成本值減任何累計減值虧損列值，並會於綜合財務狀況表內獨立呈列。

就減值測試而言，因收購而產生之商譽乃被分配至預期從收購之協同效應中受益之各有關現金產生單位，或一組現金產生單位。已獲配商譽之現金產生單位每年及凡單位有可能出現減值跡象時進行減值測試。於財政年度因收購而產生之商譽，商譽被分配到的現金單位需要於財政年度完結前作減值測試。當現金產生單位之可回收金額少於該單位之賬面值時，減值虧損被分配以削減首先分配至該單位及其後以單位內各資產之賬面值為基準按比例分配至該單位之其他資產之任何商譽之賬面值。商譽之任何減值虧損乃直接於損益表內確認。商譽之減值虧損於其後期間不予以撥回。

倘於其後出售有關現金產生單位，資本化商譽應佔之金額用於釐定出售時之損益。

Property, plant and equipment

Property, plant and equipment including leasehold land and buildings held for use in production or supply of goods or services, or for administrative purposes (other than construction in progress) are stated at cost or fair value less subsequent accumulated depreciation and accumulated impairment loss.

Construction in progress includes property, plant and equipment in the course of construction for production or for its own use purposes. Construction in progress is carried at cost less any recognised impairment loss. Construction in progress is classified to the appropriate category of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Leasehold land and building originally classified as investment properties carried at fair value is transferred to property, plant and equipment at a deemed cost equal to its fair value at the date of change in use as evidence by commencement of owner occupation.

Leasehold land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at their revalued amount, being the fair value at the date of revaluation less any subsequent accumulated impairment losses and subsequent accumulated depreciation. Revaluations are performed with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair values at the end of the reporting period.

物業、廠房及設備包括持有作為生產、提供貨品或服務或行政管理用途(在建工程除外)的租賃土地及樓宇乃按成本或公允值減去其後累計折舊及累計減值虧損入賬。

在建工程指正在建造以供生產或自用之物業、廠房及設備。在建工程以成本減累計減值虧損列賬。在建工程於完成後可供用於擬定用途時重新分類為物業、廠房及設備之適當類別。此等資產之折舊基準與其他物業資產相同，乃於資產可供於擬定用途時開始計提。

原先以公允值列賬、分類為投資物業之租賃土地及樓宇乃按以開始自用作證明用途改變當日的公允值視同為成本劃轉物業、廠房及設備。

持有用作生產或提供貨品或服務用途，或用作行政管理用途的租賃土地及樓宇，乃按其重估值於綜合財務狀況表內列賬，而重估值即指重估當日之公允值減去任何其後之累積減值虧損及其後之累積折舊。由於定期進行重估，賬面值與於本報告期末所釐定之公允值沒有重大差距。

Financial instruments

Financial assets and financial liabilities are recognised in the statement of financial position when a group entity becomes a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial assets

The Group's financial assets are classified into one of three categories: financial assets at fair value through profit or loss ("FVTPL"); loans and receivables; and available-for-sale financial assets. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

Financial liabilities and equity

Financial liabilities and equity instruments issued by a group entity are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. The Group's financial liabilities are generally classified into financial liabilities at FVTPL and other financial liabilities.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees, points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts)

Convertible note at fair value through profit or loss

Financial liabilities at FVTPL represent convertible note designated at fair value through profit or loss on initial recognition.

A financial liability may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and HKAS 39 permits the entire combined contract (asset or liability) to be designated as at FVTPL.

The convertible note with embedded derivatives whose economic risks and characteristics are not closely related to those of the host contract (the liability component) as a whole is designated as financial liabilities at FVTPL on initial recognition.

Transaction costs that are directly attributable to the issue of the convertible notes designated as financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Functional currency of a group entity is changed only if there is a change to the underlying transactions, events and conditions relevant to the entity. The effect of a change in the translation functional currency is accounted for prospectively. At the date of change, the entity translates all items into the new functional currency using the prevailing exchange rate at that date and the resulting translated amounts for non-monetary items are treated as the historical cost. Exchange differences arising from the translation of foreign operations recognised in translation reserve are not recognised in profit or loss until the disposal of the operation.

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

The Group as lessee

Operating lease payments are recognised as an expense on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised as a reduction of rental expense over the lease term on a straight-line basis.

3. Significant Accounting Policies (Continued)

Leasing (Continued)

The Group as lessee (Continued)

Land use rights represent the prepaid lease payments of leasehold interests in land under operating lease arrangements which is classified as medium-term lease other than those held to earn rentals and/or for capital appreciation purpose and classified as investment properties which is carried at fair value.

Leasehold land and buildings

The land and building elements of a lease of land and building are considered separately for the purpose of lease classification. Leasehold land which title is not expected to pass to the lessee by the end of the lease term is classified as an operating lease unless the lease payments cannot be allocated reliably between the land and building elements, in which case, the entire contract is classified as a finance lease. To the extent the allocation of the lease payments can be made reliably, leasehold interests in land are accounted for as land use rights except for those that are classified and accounted for as investment properties under the fair value model.

Retirement benefit costs

Payments to the state-managed retirement benefit schemes for staff in the People's Republic of China, excluding Hong Kong and Macau (the "PRC"), and to the Mandatory Provident Fund Scheme for staff in Hong Kong are charged as expense when employees have rendered service entitling them to the contributions.

Determination of fair value of structured finance securities

The Group's investment in structured finance securities represent a debt security with interest payments based on United States Treasury Bond and distribution from preference shares in a private company which invests in a portfolio of asset-backed securities. The fair value of the structured finance securities is determined by the directors with reference to the valuation provided by the counterparty financial institution. Details of assumptions used to determine the quoted price by the counterparty financial institution are set out in note 24.

During the year ended 31 December 2009, the Group had loss of HK\$3,174,000 (2008: gain of HK\$1,715,000) from the change in fair value of the structured finance securities.

5a. Capital risk management

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from prior year.

The capital structure of the Group consists of net debt, which includes the borrowings, net of cash and cash equivalents and equity attributable to owners of the Company, comprising issued share capital, reserves and retained profits.

The management of the Group reviews the capital structure on a continuous basis taking into account the cost of capital and the risk associated with the capital. The Group will balance its overall capital structure through new share issues and the issue of new debt or the redemption of the existing debt.

於截至二零零九年十二月三十一日止年度，由於該結構性金融證券之公允值變動而導致本集團錄得3,174,000港元虧損(二零零八年：1,715,000港元收益)。

The Group's cash flow interest rate risk as at 31 December 2008 primarily related to its bank balances carried at prevailing deposit rate, floating-rate borrowings and other payable to minority shareholder of a subsidiary. The Company's cash flow interest rate risk as at 31 December 2008 primarily relates to its bank balances, amounts due from subsidiaries and floating-rate borrowings.

The Group and the Company has not used any interest rate swaps in order to mitigate its exposure associated with fluctuations relating to interest cash flows. However, the management monitors interest rate exposure and will consider other necessary actions when significant interest rate exposure is anticipated. In addition, the Group has concentration risk on its floating rate bank balances and borrowings which expose the Group significantly towards the change in the People's Bank of China interest rate.

The Group's and Company's maximum exposure to credit risk in the event of the counterparties failure to perform their obligations as at the end of the reporting period in relation to each class of recognised financial assets is the carrying amount of those assets as stated in the consolidated statement of financial position and Company's statement of financial position respectively. The Group has significant concentration of credit risk in respect of other receivables, especially for amounts due from a buyer of the disposed associate of HK\$236,880,000 (2008: amount due from buyer of the disposed subsidiaries of HK\$165,620,000), amounts due from two associates of HK\$102,397,000 (2008: HK\$982,626,000), amounts due from two jointly controlled entities of HK\$98,080,000 (2008: HK\$63,074,000), loan receivables from three independent third parties of total HK\$451,726,000 (2008: HK\$79,790,000) and the cash collected from distressed asset but not yet distributed (as detailed in note 27) of HK\$100,993,000 (2008: HK\$144,299,000). The Group has a concentration of credit risk on liquid funds deposited with a few major banks. However, the credit risk on liquid funds is limited because the counterparties are banks with good reputation.

The Group has exposure to credit risk in respect to its investment in distressed assets through establishment of a special purpose vehicle. The underlying assets of the distressed assets are debts that are either already in default, under bankruptcy protection, or in distress and heading toward such a condition. The collectivity of these debts might affect the amount recoverable from the investment in distressed assets through establishment of a special purpose vehicle.

18. Goodwill (Continued)

The basis of the recoverable amounts of the above Unit A and Unit B and the major underlying assumptions are summarised below:

Unit A

The recoverable amount of Unit A has been determined based on a value in use calculation. That calculation uses cash flow projections based on financial budgets approved by management covering a five-year period based on estimated growth rate of 3% (2008: 3%) with a discount rate of 12% (2008: 12%). Cash flows for further five years are extrapolated at zero growth rate. Another key assumption for the value in use calculations is the budgeted revenue and gross margin, which is determined based on the unit's past performance and management's expectations for the market development.

In the opinion of the directors, there is no impairment required as at the end of the reporting period.

Unit B

Goodwill was transferred to the cost of a jointly controlled entity upon deemed disposal during the year. Details of the deemed disposal are set out in note 44.

19. Investments in subsidiaries and amounts due from subsidiaries

Investments in subsidiaries

Unlisted shares, at cost

Particulars of the Company's subsidiaries at 31 December 2009 are set out in note 52(a).

18. 商譽(續)

單位A及單位B的可收回金額及其主要的相關假定概述如下：

單位A

單位A的可回收金額乃基於使用價值計算釐定。計算方法使用經管理層批核、基於3%(二零零八年：3%)年增長率的五年財政預算所得的現金流預測及12%(二零零八年：12%)貼現率。其後五年之現金流推定為零增長率。使用價值的另一項主要假定為預算收入及毛盈利率，乃按該單位過往之表現及管理層對市場發展之預期釐定。

董事意見認為於本報告期末並沒有減值之需要。

單位B

於本年度商譽於視同出售時劃轉至共同控制公司成本值。視同出售之詳細情況載列於附註44。

Notes:

- (i) During the year ended 31 December 2009, the Group disposed of an associate for a consideration of HK\$358,233,000. The consideration is unsecured, interest free and will be settled by three instalments: HK\$100,000,000 by 90 days after the date of the disposal, HK\$100,000,000 by 31 December 2010 and HK\$158,233,000 by 31 December 2011. At initial recognition, the fair value of the consideration was HK\$336,888,000, determined by using imputed interest rate of 5.52% per annum.
- (ii) During the year ended 31 December 2007, the Group disposed of subsidiaries to an independent third party for a consideration of HK\$83,020,000. Pursuant to the sale and purchase agreement, an amount due to the Group of HK\$82,600,000 was undertaken by the buyer of the disposed subsidiaries. The original settlement date was June 2008. The amount was fully settled during the year ended 31 December 2009.
- (iii) Impairment loss was recognised on certain non-refundable deposits paid to independent third parties for a property development project in the PRC. The property development project was temporarily suspended and the directors considered that the deposits paid would not be refunded by the counterparties, hence impairment loss was recognised in full in 2008 with respect to these deposits.
